

RICOH DIGITAL TRANSFORMATION SOLUTIONS

RICOH SOLUTIONS

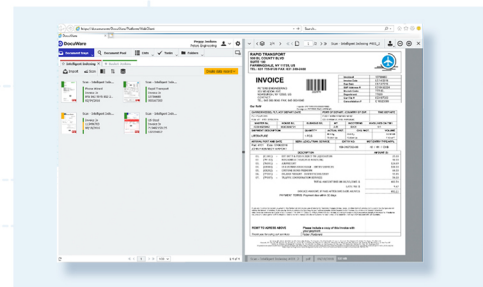

to perfectly enhance workflows
in your organization in the digital era

Today's business must always be prepared... to truly transform the organization into the digital age. Ricoh offers solutions and services that give your business the flexibility it needs to adapt to modern business operations with confidence. The solutions put an emphasis on improving and transforming operations by leveraging technology to support each process and make it more agile, while increasing the level of information security in accordance with international standards to optimize business operations, meeting the challenges of working from anywhere, anytime.

ENTERPRISE CONTENT MANAGEMENT (ECM)

A solution that helps you “manage and store” documents in an electronic format and helps you gather, process, and immediately use the data, with simple document approval workflows

Benefits of ECM Solutions

Automate document management processes. Support document approval that can be used with electronic signature solutions for streamlined workflows.

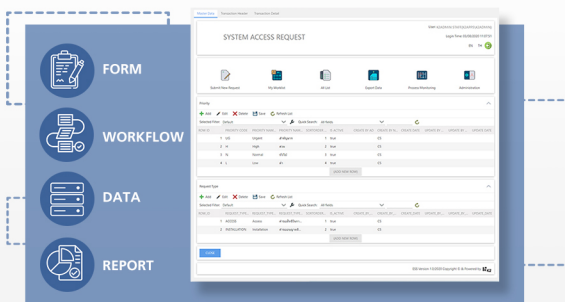

Easily and quickly manage, store, and search for documents.

Minimize manual work and errors, hidden costs, and inefficiencies.

Available both on-premises and on-cloud. Compatible with ERP and other systems in your organization.

BUSINESS PROCESS MANAGEMENT (BPM)

A solution that “creates workflows and approval systems that can be monitored in real-time” for any organization on a single platform, regardless of how difficult and complex they are.

Benefits of BPM Solutions

Manage approval processes in your business, where data is immediately gathered, processed, and distributed using automated workflows.

Requests and approvals can be made from anywhere, at any time, via both computers and smart devices.

Reduce paper consumption and costs, and free up storage space.

Process status and overview reports can be tracked at any time from the dashboard.

A cloud solution that “easily creates workflows, approval systems, and can communicate within the organization,” transforming the organization into “digital workplace” at an affordable price.

Benefits of kintone Solutions

Reduce documentation costs by quickly creating electronic forms and various approval systems based on the work of each department within the organization without IT knowledge.

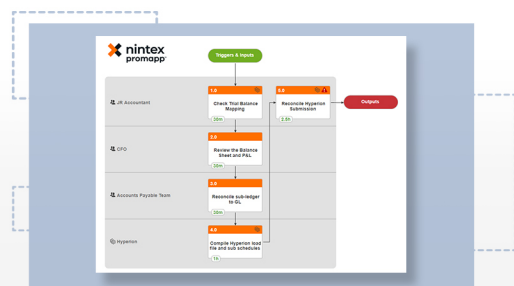

Track operational status and communicate with colleagues in real time via the system dashboard.

Easily and quickly find, access, update, and share accurate and up-to-date information stored on the system, as well as connect it to other systems instantly.

Streamline approvals within the organization. Approvals can be made quickly across all devices, including computers and smart devices.

A solution that reduces the time required to create process maps for your organization. You can start business process mapping for the workflow of each field and department, making it easier for teams to have a clear overview of the workflow and understand the sequence of each step.

Benefits of Nintex Promapp

Employees can learn and understand the processes within their organization more quickly from a clear workflow diagram.

Employees have visibility into up-to-date information as well as a detailed history of data revisions, allowing them to perform procedures in real-time while complying with organizational requirements.

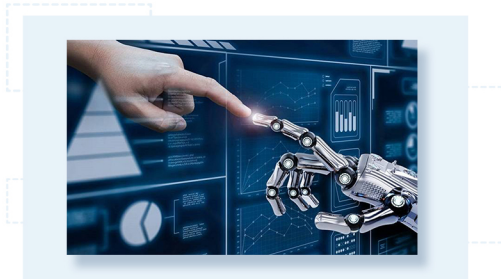

Access, update and modify workflows conveniently and quickly for better productivity.

Overall processes can be monitored via the dashboard at any time, and details can be provided in accordance with requirements and standards to increase operational transparency.

A software robot that can reduce the workload of employees in organizations with routine, repetitive, and rule-based tasks. You can teach the robot to “mimic” or to help you control the mouse and type data on the screen, reducing errors from manual data input.

Benefits of RPA Solutions

Reduces time and error from human in workflows and data provision.

Suitable for repetitive and rule-based tasks, and can be integrated with other systems existing in your organization.

Complete your tasks quickly, 24/7.

System status can be monitored at any time.

E-TAX INVOICE SOLUTION

An e-tax system for all organizations that creates and sends tax invoices and receipts to the Revenue Department and customers in an electronic file format, which is more convenient and faster than traditional paper documents.

Benefits of E-Tax Invoice Solution

Reduce the cost of preparing and delivering paper documents.

Quickly send information to clients and the Revenue Department, and track the status of documents in real-time.

Minimize documentation time, allow easy access to and search for information, and no need for paper storage.

Ensure high security of data preparation and storage.

ELECTRONIC SIGNATURE SOLUTION

An electronic signature service that is legally binding and easy to use in the most secure cloud-based service.

Benefits of E-Signature Solution

Sign authenticated handwritten documents from anywhere, anytime, via smart devices.

Ensure file integrity, save storage space, and is highly secured.

Faster and safer to use, and it is legally certified.

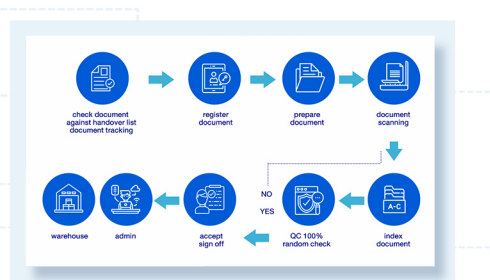

Provide an alternative way to sign documents instead of using paper, reducing the cost of printing and sending documents.

SCANNING SERVICE

Ease the workload of converting documents and digitizing paper data by bringing the resulting documents to the workflow they need right away.

Benefits of Scanning Service

Professionals consult and design the structure for data preparation and documentation according to the needs of each organization.

Save document management time and costs for long-term document storage and retrieval.

Rest assured that the document scanning and archiving processes at each stage can be tracked.

Reduce errors and increase your organization's productivity.
